

About

Analysis

According to world bank, India ia global agricultural powerhouse. It is the world's largest cattle herd, a well as the largest area under wheat, rice and cotton.

It is the second largest producer of rice, wheat, cotton, sugarcane, farmed fish, sleep and goat meat, fruit, vegetable and tea.

While agriculture's share in India's economy has progressively declined to less than 15% due to the high growth rates of the industrial and service sectors, the sectors importance in Indias economic and social fabric goes well beyond this indicator.

State  
31 Uttar pradesh  
17 Kerala  
29 Tamil Nadu  
16 Karnataka  
19 Maharashtra

Total crop production  
4.182567e+09  
2.685620e+09  
2.563321e+09  
2.316393e+09  
1.701390e+09

From the above output we can conclude that, Uttar Pradesh, kerala, Tamil Nadu, and Maharashtra are the top 5 states with highest total crop production in total for years from 1997-2022.

India's Agricultural Crop Production Analysis (1997-2021)

year  
20 1997-98  
21 1998-99  
22 1999-00  
19 2000-01  
0 2001-02

total crop production  
5.591109e+08  
6.843517e+08  
7.340065e+08  
7.362125e+08  
7.439936e+08

From the above output we can see that 1997-98 was the year with least crop production. This is possible due to lack of our capabality to record the production of crops across India.

1997-98 was the year with least production. This is potentially because of the lack of framework and mechanism to collect crop production data across the country.  
Total 55,91,10,900 Tones of crops were produced.

Rice is the choice of Farmers with 21,175 records found of rice production. Almost all states are into rice production.

West Bengal is the highest producer of Rice as per the records.
